

Architecture Scheme

Personas

- Paul Wilson is a 25 years old young man who likes technology. Paul likes to go events where he can grab ideas to use in his own life. He has a girlfriend and they are thinking of getting a house with some technology on it.
- Mary White is a 37 years old woman, married and have two kids. She like to have security on her house because of her childs. She like to go shopping and go on trips to places far away from home.

Motivation

- Our personas want to have technology on their houses
- Our personas want to control some specific components of the house
- Our personas don't want to waste money unless there are no other options.

Goals

- User should have full control of what type of room/component of the house
- User should have control to turn on/off lights, increase/decrease temperature, alarms, etc.
- User should have security in the house by knowing who is on the house or near it.
